Create Smart Spaces

TOYAMA

From Anywhere

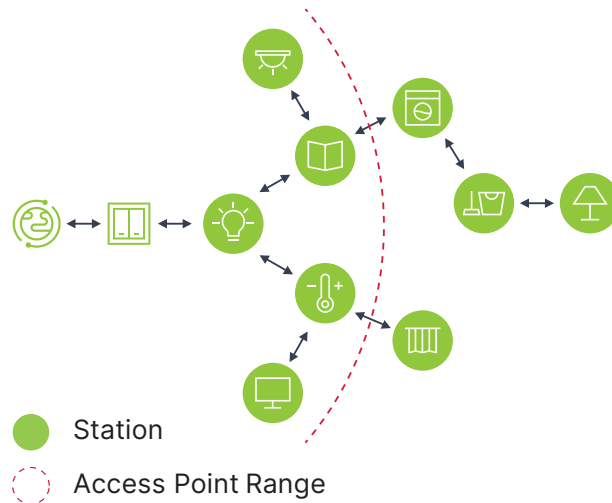

Control your home from your phone even when
you are 10,000 miles away

Get Started

Technology Platforms

Toyama offers three platforms covering all domains of automation. All platforms work with a single app with easy installation and simplicity of usage.

TMesh

Toyama's proprietary protocol mesh - TMesh - is faster and more efficient than the traditional WiFi system. Built to offload the router and remove a single point of failure, this self healing mesh system ensures network robustness and uptime.

TGate

Home Automation hub with cloud based operations for device control, multimedia equipment control and management. Suitable for large homes or villas with scene panels to orchestrate and control a large number of devices with a single tap of a switch.

Available types : 20 Nodes, 50 Nodes

Toyama WizHom App

A single app that operates all Toyama smart products for a single home or multiple homes.

With a simple, user friendly interface, Toyama WizHom app allows for control of all your smart home devices from anywhere in the world.

1. Floor Wise Organization

Smart devices on each floor can be navigated easily from within the app.

2. Multiple Home Control

A single app can be used to operate and control Toyama smart devices in different homes.

3. Favourite Devices

Home page with favourite devices allows for quick access and convenience.

Devices covered by Toyama WizHom app

Smart Lighting

On/off Controls from your app or voice

Smart Devices can be retrofit into standard metal boxes in the following modules.

2 Gang Metal Box

Indian & British Standards

Height 79mm, Width 75mm, Depth 46mm

4 Gang Metal Box

Height 79mm, Width 135mm, Depth 46mm

6 Gang Metal Box

Height 79mm, Width 207mm, Depth 46mm

8 Gang Metal Box

Height 79mm, Width 230mm, Depth 46mm

12 Gang Metal Box

Consists of touch switches same as 6M
(Height 79mm, Width 207mm, Depth 46mm)
as well as 3 modular switch inserts

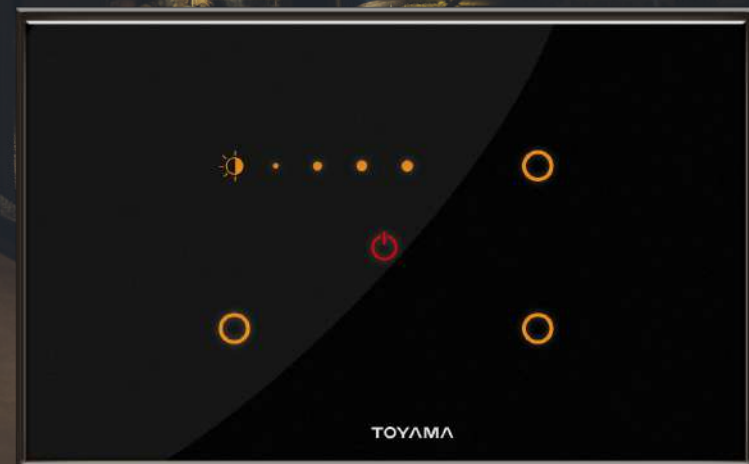

Smart Lighting

A core element in smart home automation, Toyama's smart lighting systems spell convenience, luxury and comfort like no other. Using smart touch panel switches, the WizHom app, and voice assistants like Amazon Alexa and Google Home Assistant, you can now take control of all the lights in your home remotely, no matter where you are. Smart lighting systems are the gateway into the amazing world of home automation.

Smart Dimmer

Smart dimmers are a convenience feature that offers additional control over the lighting in your living spaces. By allowing you to adjust the brightness of the LED lights in a room via voice control (Alexa and Google), Toyama's WizHom app, or a smart switch, it's a must-have for users who like to set the perfect ambiance, be it a romantic dinner or a cozy movie night

IR Blaster

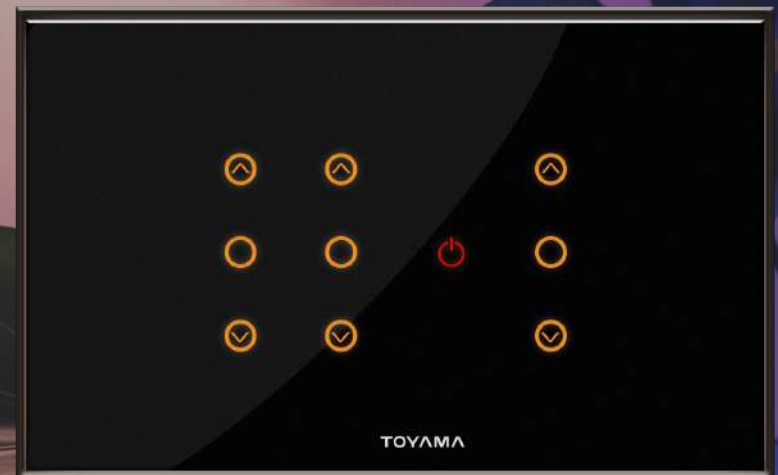

Universal Remote Control

IR blasters from Toyama are magical devices that combine the capability of all the remotes in your home and do away with the clutter. Compatible with almost any IR-operated device, this cool little gadget also allows you to operate your home devices using voice assistants and the Wizhom app. With Toyama's IR blaster technology you are never reaching for the remote again on movie nights

RGB LED Controller

Toyama's RGB LED controllers when paired with the right LED fixtures allow you to set specific hues and tones to the lighting across your home using smart touch panels or an interactive interface on the Wizhom app. Offering a great way to set the mood and ambiance for any time of the day or depending on the activity this is a great feature that allows you to improve the well-being of you and your family.

Smart Fan Control

Available as single controls or in combination with lighting, humfree fan controls ensure the hum of fans is removed allowing for soundless operations.

Control with IR Remote, Mobile App, Touch Panels or by voice control.

Thermostat Controller

Energy Saving thermostat controller allows control remotely. Scheduling the thermostat allows for automatic turning on and off when not in use thereby saving energy.

Toyama's smart thermostat controls energy in an efficient manner. It can be set to regulate temperature while away for optimised usage and lower electricity bills.

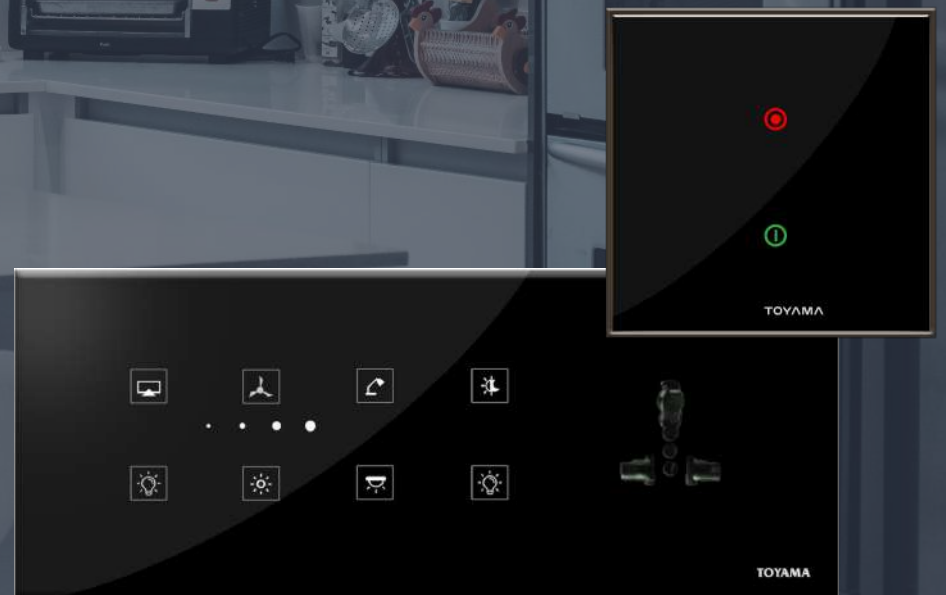

Smart Gate Opener & Smart Curtain Controller

This nifty little setup uses a combination of motorised curtain controllers to automatically close and open drapes, shades and blinds, and integrates with your modern-day Smart home setup via Wifi or Zigbee switches. Control your curtains from the comfort of your bed or couch using Toyama's smart touch panel switches. WizHom app, IR Remote, or voice control through Alexa or Google. A great home feature offering convenience, energy saving, privacy and safety.

Smart Plugs

Smart plugs are the perfect home automation solution when you have appliances like geysers, sprinkler systems or coffee makers that need to be turned on or off remotely or according to a particular schedule. It effectively makes all your appliances "smart", enabling costs and energy saving while adding a great deal of convenience to your life through app and voice assistants like Alexa and Google.

Scene Controller

Preprogrammed Scenes that orchestrate multiple devices with a single action.

Scenes are created on the Toyama WizHom app and can be activated with a single tap on the touch panel, from the Toyama WizHom application or by voice commands to Google home or Amazon Alexa.

Listed Below are few examples of scenes

GOOD NIGHT SCENE

Night lights turned on, AC set to optimum temperature. Door locks and gate secured. Curtains shut closed.

PARTY SCENE

Lights and dimmers turned on to create the right vibe. RGB lights turned on. Entertainment system activated.

WELCOME HOME SCENE

Gates open to allow your vehicle to enter. Door unlocked, Lights turned on to welcome you. Multi-room audio can be turned on and AC turned on.

GOOD MORNING SCENE

Curtains opened, geyser turned on, coffee machine turned on and lights turned off.

Modular Controls
